EDUCATION

Texas A&M University, College of Engineering

College Station, Texas

Bachelor of Science in Computer Science, Minors in Statistics and AI in Business

May 2027

Relevant coursework: Data Structures and Algorithms, Software Engineering, Machine Learning, ML in Business

EXPERIENCE

Dream Lab

College Station, Texas

Undergraduate Researcher

January 2026 – Present

- Built AnnoMath, an AI-powered multimodal college math tutoring system mirroring human practices by applying 14 pedagogically grounded annotation types to handwritten student work, in collaboration with a team of researchers
- Implemented multiple annotation types using TypeScript, React, and tldraw, covering ~22% of all annotation occurrences, identified via frequency analysis of 30 openly coded instructional videos
- Developed React/TypeScript frontend logic to control rendering of AI-generated tutoring outputs from OpenAI API
- Produced and narrated a demo video explaining system’s technical pipeline and research contributions for paper submission

Aggies Create

College Station, Texas

Team Lead and Consultant for AksaOils

August 2025 – December 2025

- Programmed a personalized product recommendation quiz using HTML, CSS, and JavaScript, made for easy Shopify integration
- Trained a Random Forest model on mock Shopify order data, achieving 98% prediction accuracy for email recommendations, enhancing customer engagement
- Led efforts on rebranding, coordinated workflow, and aligned technical components with brand identity

Signify Health

College Station, Texas

Software Engineering Consultant

September 2024 – May 2025

- Developed Signify Hex, a data visualization tool made with React/TypeScript, UberH3, Go, and PostgreSQL to connect medical providers with patients and increase provider efficiency, through Aggies Create
- Implemented Redis-based WebSocket change tracking to signal frontend data refresh only after multiple database changes, optimizing performance
- Created travel hex overlay using Mapbox and Uber H3 to show provider reachability by location and travel radius
- Enhanced UX by adding hover interactions, dark mode UI, and dynamic data fetching via gRPC contracts
- Presented live demos to Signify Health software engineering leadership and awarded 1st place among consultancy projects at the Aggies Create Innovation Expo (Spring 2025)

PROJECTS

Pearl Tea POS System

College Station, Texas

Full Stack Developer

September 2025 – December 2025

- Built a boba shop point-of-sale with JavaFX, Scene Builder, and AWS-hosted PostgreSQL for inventory and order management, used the Waterfall model
- Rearchitected system into a web application using Agile workflow, led deployment on Render and implemented secure authenticated webpages
- Integrated Text-to-Speech (TTS) API and built a drink recommendation system based on weather to enhance accessibility and user experience
- Added dynamic database-driven menu rendering and customer kiosk flow for checkout and tipping

SKILLS & LANGUAGES

Languages: Python, TypeScript, JavaScript, Java, C++, HTML/CSS, R, Mandarin Chinese (fluent)

Web, ML & Graphics: React, Next.js, Node.js, Pandas, PyTorch, Scikit-learn, XGBoost, Bootstrap, NumPy, Matplotlib, Seaborn, Tailwind CSS, tldraw, OpenGL, GLSL

Databases & Tools: PostgreSQL, Figma, Git/Github, Docker, Jira, Render
